Builder · Business & Technology · Simon Fraser University

adipoluri@gmail.com · Vancouver, BC · abhipoluri.com · github.com/AbhiPoluri · linkedin.com/in/abhipoluri

SUMMARY

SFU BBA student who ships. Built AI tools, knowledge-graph note apps, and an autonomous agent framework — all outside class. Generated \$3–5k revenue running a retail arbitrage business. Looking for a role where product thinking and execution actually overlap.

EDUCATION

Simon Fraser University

Expected May 2028

Bachelor of Business Administration · Beedie School of Business · Vancouver, BC

PROJECTS

Ollama Router

github.com/AbhiPoluri/Ollama-router

Python · FastAPI · Ollama · Local AI | 2025

- Built a lightweight FastAPI proxy that auto-routes AI requests to fast or smart Ollama models based on task complexity — simple queries hit llama3.2:3b, complex ones hit qwen3.5:35b.
- Drop-in compatible with OpenAI API, Open WebUI, OpenCode, and Page Assist. Live dashboard shows routing decisions in real time at localhost:4002.
- Routing logic scores only the last user message to avoid false positives from injected file context.

abhimem

abhimem.vercel.app

Python · FastMCP · SQLite · Ollama · Claude Code | 2025

- Built a persistent memory layer for Claude Code — extracts facts from every session using a local LLM, embeds with nomic-embed-text, and recalls semantically at next session start.
- Fully local: zero cloud, zero API keys. Uses FastMCP server + SQLite vector store.
- Integrated into daily dev workflow; meaningfully reduces repeated context-setting across sessions.

NotesgGraph

notesgraph.vercel.app

React · TypeScript · D3.js · Vector Search | 2025

- Local-first notes app with a live D3.js knowledge graph — notes auto-link based on semantic similarity.
- Zero backend; all vector search runs client-side in the browser.

Nexus Planner

nexus-planner-lemon.vercel.app

React · TypeScript · Zustand · IndexedDB | 2024–2025

- AI-powered project planning tool: decomposes high-level goals into executable tasks with Monte Carlo risk simulation and critical path analysis.
- Supports Agile, Shape Up, Waterfall, and Kanban. Runs fully offline via IndexedDB.

ClaudeInOne

claudeinone.vercel.app

AI/ML · Prompt Engineering · Framework Design | 2024–2025

- Production-grade AI development framework: 213 skills, 37 specialist agents, 95 slash commands covering the full software lifecycle.

Retail Arbitrage Business

Market Research · Inventory Management · Pricing Strategy | 2023–2024

- Built and operated a product resale business from scratch, generating \$3–5k in revenue.
 - Sourced products, managed inventory, set pricing based on market demand, handled all logistics end-to-end.
-

SKILLS

Languages

Python, TypeScript, JavaScript, SQL, Bash

Frontend

React, Next.js, D3.js, Tailwind CSS, shadcn/ui

Backend / Infra

FastAPI, Node.js, FastMCP, SQLite, Supabase, Vercel, GitHub Actions

AI / ML	Claude API, Ollama, nomic-embed-text, Vector Search, Prompt Engineering
Tools	Git, Figma, Playwright, Docker (basics)
Business	Product Management, Market Research, Retail Operations, P&L; Analysis

CERTIFICATIONS

- Google Project Management Certificate — Coursera
- Google Data Analytics Certificate — Coursera
